DATA236

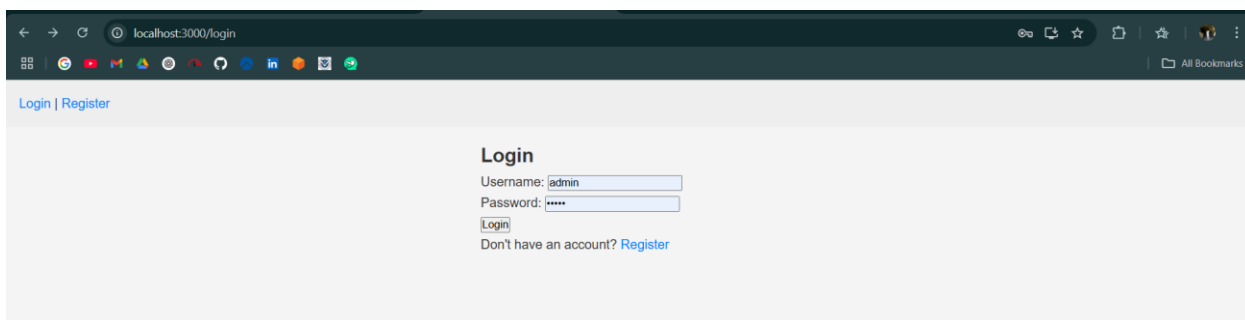

ASSIGNMENT b5

allow users to register an account using login name, email address and password, and with a preset admin account (protected by password when log in).

The first screenshot shows the login page at localhost:3000/login. It features a 'Login' heading, a 'Username:' input field, a 'Password:' input field, a 'Login' button, and a link 'Don't have an account? Register'. The second screenshot shows the register page at localhost:3000/register. It features a 'Register' heading, a 'Username:' input field with the value '123456789', an 'Email:' input field with the value 'test7', a 'Password:' input field with masked characters, a 'Register' button, and a link 'Login'.

Preset admin account with password already assigned in code but can later be changed inside the app.

The screenshot shows the login page at localhost:3000/login. The 'Username:' input field is pre-filled with 'admin' and the 'Password:' input field is pre-filled with '****'. The 'Login' button is visible, along with the link 'Don't have an account? Register'.

Design to allow users to search for hot/spicy dishes or dishes satisfy price condition in using React components with typical elements (e.g., buttons, forms, input, etc.).

Search Dishes

Spicy? (True/False):

Max Price:

A. Only price

Search Dishes
